Skill Highlights

- Website Designing
- Circuit design.
- PCB designing
- Creative Problem-Solving
- Clear Communication

Software Skills

- Vim Editor
- Cisco Packet Tracer
- Visual Studio Code
- Arduino IDE
- Pycharm
- Proteus
- Ltspice
- Matlab

Coding Languages

- C++
- Html
- CSS
- Python

Education

Bachelor of Electrical Engineering
International Islamic University, Islamabad
CGPA: 3.33

Experience

- **06/2022-08/2022**
Intern Zimco
Learning:
  - Iot
  - Power Systems
  - Augmented reality

- **06/2021-08/2021**
Intern
Quantum Mechanics
Supervised the team for:
  - Fitting of the panels.
  - Wiring of panels.
  - Connection of inverter.
  - System of net metering.

- **07/2022**
Seminar
Wireless Communication
International Islamic University Islamabad

- **06/2020-08/2020**
Sales Agent
Zaka Solutions
  - Marketing/sales of solar in US

Projects

Final Year Project:

- Iot Based Smart Highway

We have developed smart highway project based on NodeMCU (ESP8266) and Arduino. It saves cost and energy using auto controlled light through internet and motion detector. It also serves the purpose of automatic watering system which automatically sprinkle the water on the green belt near highways by detecting low moisture level. It also saves the labor cost using image processing speed detection. It saves around 50% of the energy and 50% of water and 10% – 20% of fuel. We have used renewable energy source.

Other Projects:

- Sudoku Solver
- Security door lock system using transistors and SPDT relay.
- Burglar Alarm using PIR sensor and transistor.
- Elevator controller using FPGA.
- Power switching using DPDT relay.

Major Courses

- Computer Networks
- Communication System
- Wireless communication
- Data Structure
- Digital Signal Processing
