PROFESSIONAL SUMMARY

Full stack developer with hands-on experience building React.js front-ends and integrating REST APIs against MongoDB and MySQL databases, plus a background automating backend workflows with Python. Comfortable working across the stack — from responsive, component-based UI to API integration and data-driven features — with solid Git-based version control and code review practice in fully remote, cross-functional teams. Detail-oriented about code quality, clear technical documentation, and delivering maintainable solutions.

CORE SKILLS

- Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS, Flexbox & Grid, Reusable UI Components
- Backend & APIs: Node.js, RESTful API design & integration, Python (workflow automation)
- Databases: MongoDB, MySQL — schema design, querying, and integration with front-end features
- Tools & Practices: Git, GitHub, Code Review, Cross-Browser/Device Testing & Debugging, Agile Remote Collaboration, Technical Documentation, Figma (design handoff)

PROFESSIONAL EXPERIENCE

Full Stack Developer — *Pakcelerant*

Jan 2023 – Dec 2023

- Built and integrated REST APIs, fetching and displaying data from MongoDB and MySQL to power dynamic full-stack features.
- Wrote clean, readable React.js code to turn UI designs into functional, reusable web components.
- Tested features across browsers and devices to catch and fix visual and functional inconsistencies before release.
- Collaborated remotely with designers and developers using Git, participating in code reviews to maintain code quality across the stack.

Associate Consultant – SAP — *TallyMarks Consultancy*

Jan 2025 – Present

- Automated recurring backend workflows with Python, applying a practical, maintainable approach over unnecessary complexity.
- Wrote clear internal technical documentation of processes and logic so the wider team could understand and reuse the work.

KEY PROJECTS

Nexus AI — Desktop AI Assistant (Full Stack: Electron, React, TypeScript)

- Built a cross-platform desktop application with an interactive front-end for voice interaction, task automation, and conversation history display.

Food Delivery Application — Full Stack (React.js)

- Built a responsive front-end for a full-stack food ordering platform, including shopping cart UI and order management screens integrated with backend order data.
- Demo: youtube.com/watch?v=Kdfp-EkRTWs

Pakcelerant — Startup Accelerator Landing Page (React, SCSS, Bootstrap)

- Built a responsive landing page with CSS keyframe animations and breakpoint-based media queries optimized for mobile, tablet, and desktop.

Business Website — Janjua Brothers Construction (React)

- Designed and built a live, responsive business website to showcase services and generate client inquiries. Live: janjubrotherss.com

EDUCATION

Bachelor of Science in Electrical Engineering

International Islamic University, Islamabad | CGPA: 3.38 / 4.0
